

Staff travel guidelines – Extended Operating Protocols

Prior to travel please ensure that a self-monitored test is performed to determine if you show any signs of infection. If test results are showing positive (infected) please DO NOT Travel and immediately inform the correct authorities.

These protocols are to be observed while travelling to and from work, as well as when travelling in groups during work hours.

- Please travel equipped with PPE issued at all times.
- Avoid travelling in groups at all times possible.
- Please maintain social distancing at all times possible. A minimum of 6 feet is to be observed.
- When travelling in groups or restrictive areas, ensure that a physical barrier is placed between yourself and the next individual to reduce the risk of infection.
- When travelling and having to access public areas, please utilise disinfectant provided at all times.
- If the public area has no disinfection policy, it is strongly advised not to use.
